Lisbon, Portugal

BGI, IASA and Thales will organize an informative webinar on the European EIT Urban Mobility program

The EIT Urban Mobility Portugal Hub - composed of Building Global Innovators (BGI), IASA and Thales Portugal - will hold an informative webinar on April 6th, to present funding opportunities in 2023 within the EIT Urban Mobility, as well as ways to engage with this European body.

The EIT Urban Mobility Calls 2023 Info Webinar is aimed at stakeholders from the urban mobility industry and smart cities, namely startups, companies, government entities and others interested in receiving funding and support for the development of projects, by this entity of the European Institute of Innovation and Technology (EIT). During the event, the participants will be able to learn the goals and the process of this funding call.

The webinar will take place from 10 am to 12 pm, in an online format, with reserved Q&A time slots. All interested parties can find out more information and register in advance here.

About the EIT Urban Mobility Portugal Hub

The EIT Urban Mobility Portuguese Hub was created in 2020, with the aim of raising awareness of urban mobility issues and promoting innovative solutions to respond to the mobility challenges of Portuguese cities. In the last two years, several open innovation projects were carried out to make several municipalities - Braga, Lisbon, Fundão, Angra do Heroísmo, Abrantes and Covilhã - more livable, accessible and sustainable. In 2023, BGI, IASA
and Thales Portugal will continue to bridge the gap between cities and citizens and promote initiatives to transform Portuguese cities into true living labs - places of excellence to test disruptive technologies created by entrepreneurs, with the goal of solving real mobility problems and making urban spaces smarter.

**About EIT Urban Mobility**

EIT Urban Mobility is an initiative of the European Institute of Innovation and Technology (EIT) which, since January 2019, has been encouraging positive changes in the way people move around cities. EIT Urban Mobility aims to be the largest European initiative for the transformation of urban mobility. Co-financing of up to €400 million (2020–2026) from the EIT, a body of the European Union, will help to achieve this goal.
